

## UCAMA Construction Report #10

Because of the number of inquiries we have received regarding the progress of our new museum facility on Jasper Avenue, UCAMA has decided to prepare month end construction reports. These reports will be sent out to our friends and supporters until Phase 1 is complete.

With the beginning of the new construction season, substantial progress has been made. The most impressive is the laying of the steel for the third floor. Thanks to Hugh Lee we have some wonderful action photographs of the work in progress which can be viewed on the UCAMA website ([www.ucama.com](http://www.ucama.com)) and by following the link to Hugh's [Flickr](#) page.

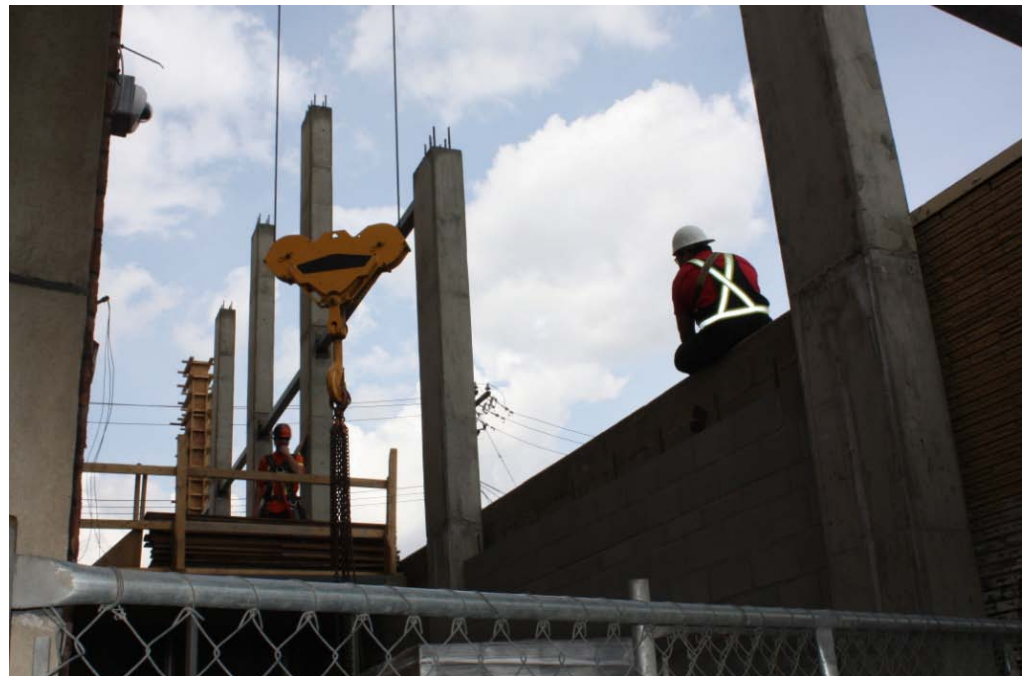

The concrete block wall on the west side of the new museum has risen to the full height of the third floor.

The extension on the east side of the museum is also moving upward. The columns for the extension on the east side of the museum are in place.

For the first time steel can be seen from Jasper Avenue rising above the roof line of the Lodge Hotel. We look forward to laying the steel for the fourth floor in June.

Stay tuned for further updates next month.
